GLOSSARY

[View Full Glossary](#)

- First Owner**
 When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.
- Lease**
 When someone leases a car from a dealer, the dealer actually sells the vehicle to a leasing company. The leasing company then collects payments for the vehicle from the new owner for 24, 36, 48 or more months. A leasing company can be an independent car dealer or a car manufacturer.
- Ownership History**
 CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.
- Title Issued**
 A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

The National Highway Traffic Safety Administration (NHTSA) provides 3 different ratings - [full-width frontal crash test](#) , [side impact crash test](#) , and [rollover resistance](#) . The frontal crash test indicates how well the safety features and restraints will protect an occupant in a head-on collision. The side-impact test conveys the chance of a severe chest injury, while the rollover resistance rating estimates the risk of rolling over in a single vehicle crash. Go to [NHTSA](#) to learn more about these results.

Insurance Institute for Highway Safety (IIHS) conducts four 5 mph crash tests to assess bumper performance. These results convey how well this 2006 MERCEDES-BENZ E3504M AWD bumpers will protect the car body from damage in low-speed collisions. Low-speed damage repair costs are obtained from the Insurance Institute for Highway Safety, Highway Loss Data Institute.

[Back to top](#)

Injury, Collision, & Theft Indicators

The Insurance Institute for Highway Safety (IIHS) does not provide injury, collision or theft information for this 2006 MERCEDES-BENZ E3504M AWD .

Index:

[Injury Index](#)

[Collision Index](#)

[Theft Index](#)

Score:

No data from HLDI

No data from HLDI

No data from HLDI

Rating:

No data from HLDI

No data from HLDI

No data from HLDI

These scores are stated in relative terms, with 100 being the average for all cars in each category. Scores greater than 100 represent higher risk in each category. For example, an injury indicator score of 122 means that a passenger in this model is 22% more likely to be injured in an accident. Injury, collision, and theft indicators are provided by the Insurance Institute for Highway Safety, Highway Loss Data Institute.

New Car Test Drive Review

NewCarTestDrive.com

Category:

Summary:

Review:

More power, more choices.

By Mitch McCullough, NewCarTestDrive.com

The Mercedes-Benz E-Class offers a wider range of choices than ever before. All have the attributes that have long made the E-Class a benchmark among luxury cars. Every model delivers a combination of safety, luxury, practicality, performance, status, and cost of operation that's difficult match. This remains an iconic car in a market segment crowded with good cars.

NewCarTestDrive.com editor Mitch McCullough reported from Los Angeles, with J.P. Vettrano and Jim McCraw reporting from Detroit.

Overview:

The 2006 Mercedes-Benz E-Class features a more powerful standard engine, the one that comes on the most popular model. This new V6 is a welcome improvement, but it really does not change the basic character of what was already a fine automobile.

The E-Class in many ways epitomizes the Mercedes-Benz brand, at least in the eyes of many consumers. It's the company's best selling line worldwide and one of the best-selling Mercedes models in the United States.

The E-Class describes a full line of big, roomy sedans that are solid, safe, practical, comfortable, luxurious, and fast. Yet the cost of operating the popular E350, in terms of fuel consumption and maintenance, can be quite reasonable. The E-Class features some of the world's most advanced safety technology. And, what most people think of when they think of Mercedes, the E-Class expresses status in elegant, understated fashion.

Since a frame-up overhaul for model year 2003, the E-Class has expanded steadily, and now includes seven variants: sedans that seat five, wagons that seat seven, V6 engines, V8s or one of the finest diesels offered in the United States, optional weather-busting all-wheel drive and screaming super-performance models from supertuner AMG. Any of these seven models delivers a combination of attributes surpassed by few cars or trucks anywhere.

For 2006, there is a slight change in E-Class nomenclature, thanks to a change in engine size. The E350 sedan and wagon are powered by a new-generation 3.5-liter V6 that produces 20 percent more power than the previous 3.2-liter V6 (used in the E320) with no decrease in fuel mileage. The E350 is the Mercedes' first dual-overhead cam V6 and it generates 268 horsepower, compared to 221 from the 3.2-liter V6 it replaces. Yet, matched to Mercedes' high-tech, seven-speed automatic transmission, the E350 loses nothing in mileage to its less powerful predecessor.

Meanwhile, there is no better example of how far passenger car diesel technology has advanced than the E320 CDI with Mercedes' impressive common-rail direct injection turbodiesel engine.

Also new for 2006 is a supercharged E55 AMG wagon boasting 469 horsepower. Woe is the guy in the sports car who smirks at this stodgy station wagon. It is truly a wolf in sheep's clothing.

The Mercedes E-Class is an icon, a benchmark in its class. It competes in one of the most competitive market segments today as it goes toe-to-toe with outstanding luxury sedans such as the Audi A6, BMW 5 Series and Acura RL.
